EDUCATION

Bachelor of Design

FLAME University
2023-2027

A Level

Cambridge International
2023

CORE SKILLS

- Systems Thinking
- Prototyping
- Design Systems
- Interaction Design
- Circuit Design
- Physical Computing
- Embedded Interaction
- AI-Assisted Design
- Agentic AI Workflows

TOOLS

Design

Figma Fusion 360
 Adobe Suite n8n

Development

React TypeScript
 Vite Tailwind

Programming

Python YOLOv8
 Arduino IDE

Hardware

ESP32

APIs

Firebase Gemini
 Calendar

ABOUT ME

I am a third-year Bachelor of Design student at FLAME University focused on building phygital products that connect hardware, software, and human interaction. My work spans product design, UI/UX, and physical computing, where I translate user needs into practical prototypes through research, structured problem-solving, and iterative development.

EXPERIENCE

UI/UX Intern

RAHI Platform Technologies | 4 Weeks

Contributed to Version 2 of their design system, improving component consistency and structure for scalable product UI.

Industrial Design Mentee

Industrial Design Mentorship | 8 Weeks

Worked on redesigning a masala dani with a focus on usability, form refinement, and practical everyday interaction.

KEY PROJECTS

ClassFlow Agentic AI | Creator & Developer

- Built a scheduling system that converts chat prompts into structured class calendars.
- Implemented authentication and database persistence using Firebase Auth and Firestore.
- Designed conversational UI flow to simplify schedule creation and editing.

Revela Tangible Interface

- Co-created a screen-free embedded device for children aged 4 to 7, providing proximity-based feedback using light.
- Engineered a wand and beacon system utilising ESP32 modules and NeoPixel LEDs.

WePick UI/UX Design

- Designed a social shopping platform that enables collaborative, real-time purchasing decisions.
- Created user flows, storyboards, visual identity, and a comprehensive design system.

SolarLink Service Design

- Tackled solar adoption as a decision-making issue rather than solely a technological challenge.
- Introduced the "Solar Sunday" initiative to encourage structured community engagement.

Code Experimentation Developer

- Developed YOLOv8 live object detection pipeline using Python and ONNX web runtime.

ADDITIONAL WORK

- Generative design explorations for Lamborghini-inspired jet ski concept.
- Motion graphics project inspired by Nothing brand visual identity.
- Nature photography practice spanning 10+ years.
